

SUMMARY

I'm an experienced Software Developer with over five years at OpenText India. I specialize in Web Service Development and have strong skills in Design Patterns, Distributed Systems, and Microservices. I'm proficient in using cloud platforms like AWS and GCP. I'm known for writing clean code, debugging efficiently, and quickly fixing bugs. Check out my work at pankajvyas.in.

SKILLS

- **Programming Languages:** Java, Python
- **Cloud Platforms:** GCP, AWS
- **Containerization and Orchestration:** Docker, Kubernetes (K8S)
- **Messaging and Streaming:** Kafka, FluentD
- **Version Control:** Git, Perforce
- **Web Technologies:** J2EE, Spring, React, HTML, CSS

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

MIT Group of Institutes, Ujjain, Madhya Pradesh (2019)

Intermediate, Mathematics and Computer Science

Jawahar Navodaya Vidyalaya, Ratlam, Madhya Pradesh (2015)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

OpenText, Bengaluru
August 2023 – Present

- **Developed Cloud-Native Applications:** Built and deployed microservices on Google Kubernetes Engine (GKE), leveraging Helm charts for efficient management and Ingress for URL exposure.
- **Optimized Docker Containers:** Created optimized Docker images, reducing base image size and enhancing performance with Alpine Linux.
- **Real-time Data Streaming Solutions:** Designed and implemented real-time data streaming systems using Kafka, integrating them with New Relic for monitoring.

Software Engineer

OpenText, Bengaluru
October 2021 – August 2023

- **Automated Java Library Management:** Created a Python-based tool to streamline the upgrading of Java libraries, ensuring seamless integration in non-package manager projects.
- **AWS-Based Application Development:** Developed and deployed applications on AWS, integrating advanced monitoring solutions to ensure high performance and reliability.
- **Cloud Logging Solutions:** Developed comprehensive logging systems using Graylog, Kafka, and FluentD to ensure efficient event tracking and data streaming. Developed a Java utility tool to stream data from Kafka Servers to Excel, enhancing data analysis capabilities.
- **Enhanced Web Applications:** Improved existing web applications to support the latest technologies and standards, ensuring compatibility and enhanced performance.

Associate Software Engineer

OpenText, Bengaluru
August 2019 – September 2021

- **Java Development for Composer:** Contributed to the development of Composer, an Eclipse-based RCP product, by upgrading Java support and adding new features.
- **Feature Development:** Implemented robust logging systems and online help features, enhancing the functionality and user experience of Documentum Composer.
- **Security Enhancements:** Developed and implemented solutions to address security issues identified by Blackduck and Fortify scans, ensuring application resilience.
