SUMMARY

Software Developer with 5+ years of experience at OpenText India, specializing in Web Service Development, Microservices, and Cloud Computing. Proven track record in designing scalable solutions, optimizing performance, and swiftly resolving critical issues. Proficient in Java, Python, and cloud platforms (AWS, GCP). Recognized for delivering clean, efficient code and enhancing system reliability.

KEY ACHIEVEMENTS

- **Cloud Migration:** Successfully led the complete migration of an on-premises product to the cloud, improving scalability, reducing infrastructure costs, and enhancing overall performance.
 - **Optimized Docker Containers:** Created optimized Docker images, resulting in faster deployments and improved performance.
 - **Enhanced Data Processing:** Designed and implemented a real-time data streaming system with Kafka, significantly improving data processing speed.
-

SKILLS

- **Programming Languages:** Java, Python (Language is not bound)
 - **Cloud Platforms:** GCP, AWS
 - **Containerization and Orchestration:** Docker, Kubernetes (K8S)
 - **Messaging and Streaming:** Kafka, FluentD
 - **Version Control:** Git, Perforce
 - **Web Technologies:** J2EE, Spring, React, HTML, CSS
-

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

MIT Group of Institutes, Ujjain, Madhya Pradesh

2015 – 2019

Intermediate, Mathematics and Computer Science

Jawahar Navodaya Vidyalaya, Ratlam, Madhya Pradesh

2013 – 2015

PROFESSIONAL EXPERIENCE

Senior Software Engineer

OpenText, Bengaluru

August 2023 – Present

- **Cloud-Native Applications:** Built and deployed microservices on Google Kubernetes Engine (GKE) using Helm charts and Ingress for efficient management and URL exposure.
- **Real-time Data Streaming Solutions:** Designed and implemented real-time data streaming systems using Kafka, with integration into New Relic for monitoring.

Software Engineer

OpenText, Bengaluru

October 2021 – August 2023

- **Automated Java Library Management:** Created a Python-based tool to streamline Java library upgrades, ensuring seamless integration in non-package manager projects.
- **Cloud-Based Application Development:** Developed and deployed applications on Cloud, integrating advanced monitoring solutions for high performance and reliability.
- **Cloud Logging Solutions:** Developed comprehensive logging systems with Graylog, Kafka, and FluentD, and a Java utility tool to stream data from Kafka to Excel, enhancing data analysis capabilities.
- **Enhanced Web Applications:** Upgraded existing web applications to support the latest technologies and standards, ensuring compatibility and improved performance.

Associate Software Engineer

OpenText, Bengaluru

August 2019 – September 2021

- **Java Development for Composer:** Contributed to the development of Composer, an Eclipse-based RCP product, by upgrading Java support and adding new features.
- **Feature Development:** Implemented robust logging systems and online help features, enhancing Documentum Composer's functionality and user experience.
- **Security Enhancements:** Developed and implemented solutions to address security issues identified by Blackduck and Fortify scans, ensuring application resilience.

A Note to the Recruiter

If you've made it this far, I hope you've gained a clear picture of who I am and what I can bring to your team. I have a strong track record of fixing even the most stubborn bugs in legacy code, ensuring that old systems run as smoothly as new. My programming language skills are adaptable, and I'm always eager to learn new technologies to meet the demands of any project. I'm excited about the opportunity to contribute my skills and grow with your company.
