SUMMARY

Experienced Software Developer with over four years of expertise at OpenText India. Specialized in Web Service Development, proficient in Design Patterns, Distributed Systems, and Microservices. Demonstrated capability in leveraging cloud platforms including AWS, Azure, and GCP. Recognized for writing clean, efficient code, adept at debugging, reviewing application defects, and proficient in bug fixing.

SKILLS

- **Programming Languages:** Java, Python
- **Cloud Platforms:** GCP, AWS
- **Containerization and Orchestration:** Docker, Kubernetes (K8S)
- **Messaging and Streaming:** Kafka, FluentD
- **Monitoring and Logging:** New Relic, Graylog
- **Version Control:** Git
- **Web Technologies:** J2EE, Spring, React, HTML, CSS
- **Development Tools:** Eclipse RCP, Helm

EDUCATION

Bachelor of Engineering in Computer Science and Engineering
MIT Group of Institutes, Ujjain, Madhya Pradesh (2019)

Intermediate, Mathematics and Computer Science
Jawahar Navodaya Vidyalaya, Ratlam, Madhya Pradesh (2015)

PROFESSIONAL EXPERIENCE

Senior Software Engineer
OpenText, Bengaluru
August 2023 – Present

- **Migrated DMS application to Google Cloud Platform (GCP):** Successfully moved a complex enterprise app to the cloud, ensuring it worked smoothly. Used Google Kubernetes Engine (GKE) for managing containers and Cloud IAM for secure access control. Set up GKE clusters, namespaces, and security groups. Dockerized the application, created Helm charts, and configured Ingress for URL exposure on Google Kubernetes Engine (GKE).
- **Docker Image Upgradation:** Enhanced performance and resource efficiency by upgrading Docker product’s base image from Oracle Linux to Alpine Linux. Separated Tomcat image from the product image for better deployment flexibility.
- **Real-time Data Streaming:** Directed a project to stream real-time data from Kafka brokers to New Relic dashboard.

Software Engineer

OpenText, Bengaluru

October 2021 – August 2023

- **Automated Java Library Upgradation:** Developed a Python solution for upgrading Java libraries in non-package manager projects, improving maintenance processes.
- **AWS Deployment & Monitoring:** Oversaw AWS deployment, integrated New Relic monitoring scripts for enhanced product performance. Managed clusters, file systems, and security protocols.
- **Logging & Cloud Solutions:** Implemented Graylog for logging, introduced root/non-root squash features. Managed Helm charts installation on Azure and GCP.
- **Event Logging & Streamlining:** Utilized Kafka and Fluentd for efficient event logging. Created a Java utility tool for streaming data from Kafka Servers to Excel.
- **Technological Upgrade & Migration:** Upgraded Visual Studio support (2013 to 2019) and migrated web apps to support Tomcat 10.
- **Vault Integration:** Led Vault integration for secure secret management, strengthening cloud solution security.

Associate Software Engineer

OpenText, Bengaluru

August 2019 – September 2021

- **Java Upgrade:** Led the upgrade of Java support (from 1.8 to 11) in Composer, an Eclipse-based RCP product for crafting and customizing Documentum applications.
- **Feature Implementation:** Developed critical features like robust logging systems and online help in Documentum Composer.
- **Security Resilience:** Addressed and fixed security issues identified by Blackduck and Fortify scans.

Intern

OpenText, Bengaluru

March 2019 – July 2019

- Developed and integrated a Workflow Management Application.
- Automated HTML forms creation for streamlined data input processes.

I solely affirm that the information provided in this resume is accurate and complete to the best of my knowledge. I understand that any misrepresentation or falsification may result in disqualification from consideration for employment opportunities.
